

My comment is concerning the change in the Low Power FM broadcast service and its affect on FM translators. I am a listener of K-Love in Raleigh, NC. K-Love is broadcast on a FM Translator from the broadcast studio in California. K-Love serves as a vital part of the Christian community in the Raleigh-Durham area by broadcasting announcements of area events and sponsoring local concerts and entertainment as well as playing great music. I would hate to see their broadcasts end in this area so I urge you to reconsider the change in LPFM broadcasting.
